**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 06 September 2005 has been entered.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 16-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kim et al (6,301,587) in view of Mishina (5,745,643).

Regarding claims 16-19 , Kim discloses an information storage medium (Figs. 1-6) configured to have data recorded thereon and data reproduced therefrom by an information recording/reproducing apparatus, said data including control information and audio/video data having a still picture video object, said medium comprising,

a control information area (column 7, Figs. 1, 3,5, 8) for storing, still picture audio/video file information table including still picture audio/video file information for managing the still picture video object, and

program chain information including cell information for one of a movie video object of the audio/video data and the still picture video object of the audio/video data, wherein said cell information includes cell general information containing information of a cell type corresponding to the still picture video object, said still picture audio/video file information includes group information of the still picture video object, said group information includes entry information of the still picture video object; and a data area (Fig. 3) for recording the audio/video data is configured to include a sub-picture stream, wherein said entry information includes entry type information containing number information indicating whether the sub-picture stream (text stream number ) is included (column 4, lines 55-68) .

Further for claim 17, Kim teaches method of recording control information and audio/video data on the medium ( Figs. 7,8) .

Further for claims 18 and 19, Kim further teaches reproducing apparatus for reproducing the control information and audio/video data from the medium (Fig 7, column 8) .

Kim fails to teaches that the text stream (subpicture) includes bitmap data .

Mishina teaches an apparatus for forming a subpicture steam (text, caption or subtitle) having a bitmap data (column 1, lines 35-40, column 27, lines 35-50, column 35, lines 16 to column 36,lines 3).

It would have bee obvious to one of ordinary skill in the art to modify Kim with Mishina by providing the subpicture of Kim with bitmap data thereby easily controlling the display the subpicture on the screen.
